Personal Laundry Guidance

INTERIM guidance

Definition: Recommendation for laundry cleaning for staff and personal scrub usage.

Children's Minnesota will continue to supply hospital scrubs and laundry service for current designated groups in surgery, deliveries, CPD, etc. For all other areas:

- It is always good practice to remove shoes and clothing worn in clinic as soon as you return home.
- Clothing worn in clinic should be laundered after each use with hot water on a standard cycle and may be combined with other laundry.
- If you have personal scrubs and would like to wear them in clinic, you are able to do so at this time. Based on personal preference, you may change in and out of your personal scrubs at the clinic.

Disclaimer: This guideline is designed for general use with most patients; each clinician should use his or her own independent judgement to meet the needs of each individual patient. This guideline is not a substitute for professional medical advice, diagnosis or treatment.
