

## Anesthesia Workflow Summary and Quick Orders page

The Anesthesia Workflow Summary page is the default page upon opening a chart. This page layout allows chart review and documentation to take place on a single page.

To add the Anesthesia and Quick Orders pages to your view, click on  and select.

The **Anesthesia Workflow Component List** is located on the left side of the page. The Component List can be pinned to remain visible. Unpin it to close the view. It will open when hovering over the Settings icon. This is a fully customizable list. Click and drag a component to move it to create a customized list order.

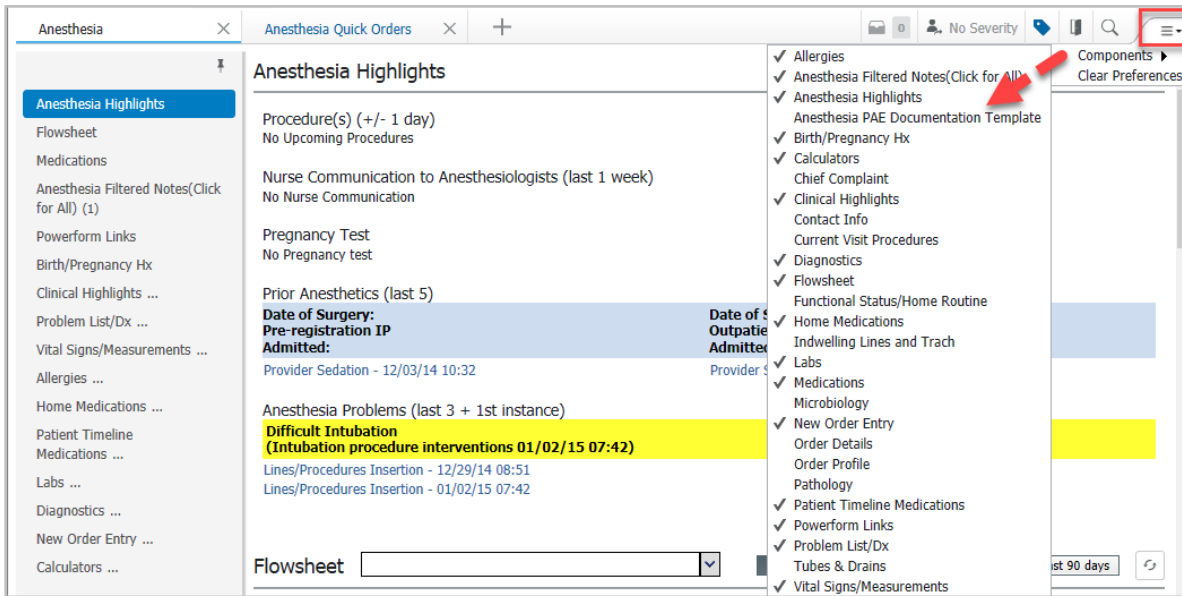

Hover to see Menu

**Anesthesia Workflow Summary**

**Hidden Component List**

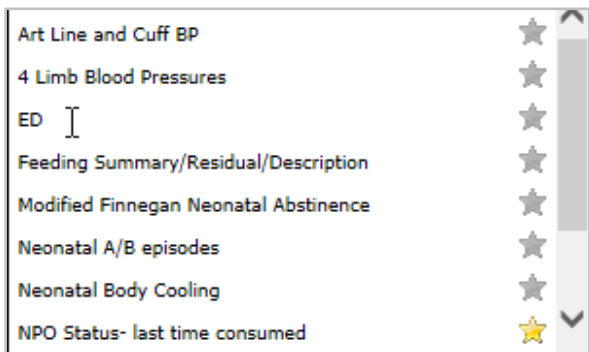

The component list can be customized by adding or removing components. A full list of components can be found by clicking on the three-line Settings button found in the upper right. Checked items display and unchecked items are hidden from the preferred view.

**Note:** CRNAs can deselect the Anesthesia PAE Documentation Template and the History of Present Illness to remove from menu view.

**Flowsheet**

Displays information charted by nursing in the Pre-Op Assessment PowerForms. There are Anesthesia specific flowsheets that can be selected as a favorite.

**Anesthesia Highlights**

Displays Anesthesia specific information.

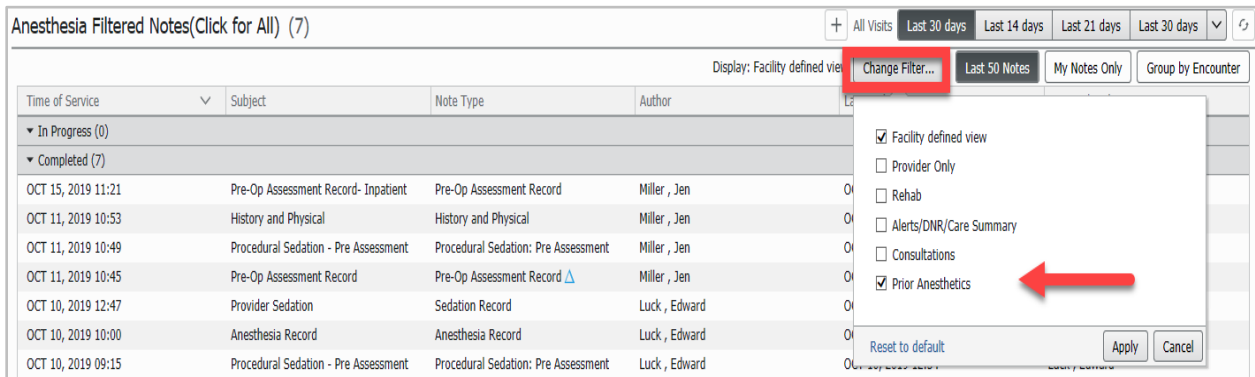

- Scheduled Procedures
- Nurse Communication to Anesthesiologists within the last week
- Prior Anesthetics (last 5) links to documentation
- Anesthesia Problems (last 3 + 1 instance)
- Prior Sedation/Anesthesia Problems links to documentation
- Vascular Access
- Airway Management

**Anesthesia Workflow Summary**

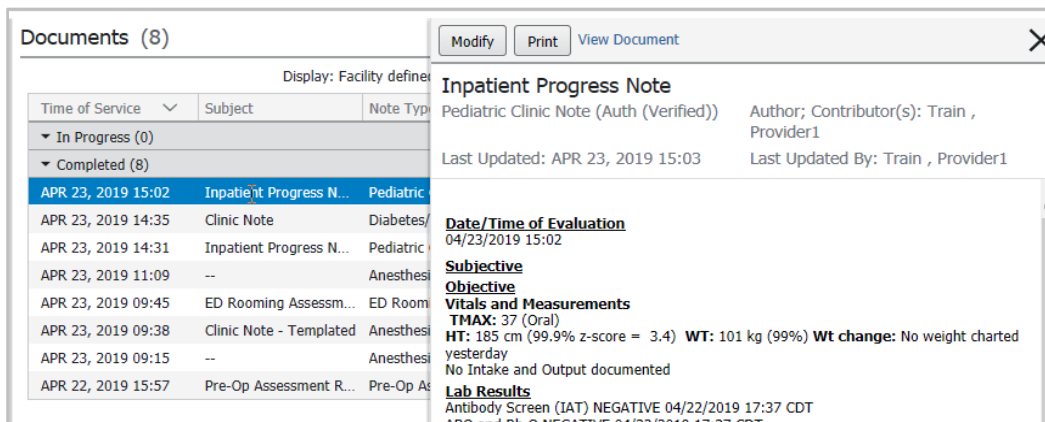

**Anesthesia Filtered Notes (click to see all)**

Displays Anesthesia relevant notes. This is a filtered component. The component header is a link to view all available documents. Click on the header to link to the **Notes** page. The filters for this component enable filtering by date range, note type, My Notes Only, and encounter.

- Customize filters to display Prior Anesthetics by clicking on the Change Filter button and adding a check mark to Prior Anesthetics

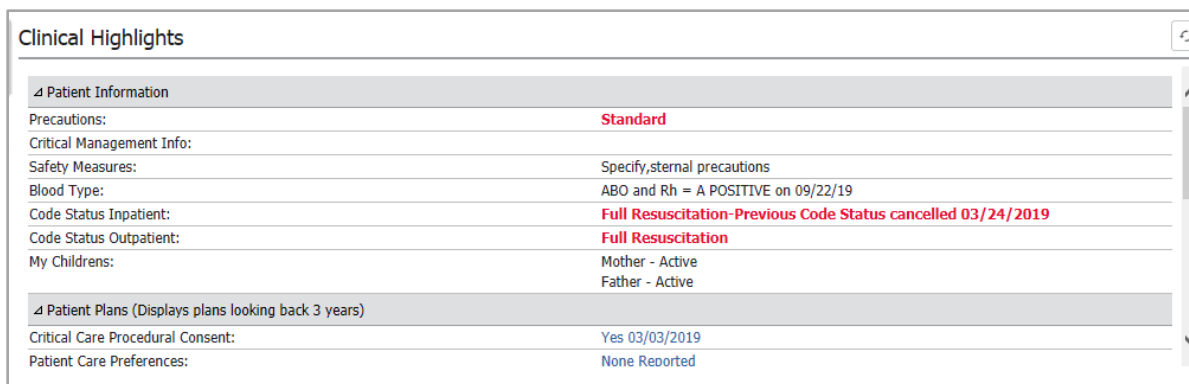

- Select a note to open and click. A preview pane will display the note and selecting **View Document** will open the note to the finalized view. An open note can be modified, placed in error or forwarded.

**Clinical Highlights**

Displays patient specific chart highlights: Difficult Airway, Blood Type, Code Status, and Patient Care Preferences and more.
