

Anesthesia: Clear Deficiencies

Clear Deficiencies from the Anesthesia Record Deficiency Report

To clear deficiencies on the Anesthesia Record when using the Discern Analytics Anesthesia Record Deficiency Report:

- 1. Open SA Anesthesia to the **Select Case** window.
- 2. In Search Criteria, enter the case number in the **Case Number** field. Click **Search**. **Note: If** you do not have the case number, a search can be performed by Patient Name or MRN.

				Select Case						-
Surgery S Dpt				A St	at date 77					8

- 3. Open the case.
 - Is the case finalized? The word **Finalized** should appear behind the case number at the top of the record.

SurgiNet: Anesthesia - [MPLS-2020-69 [Finalized]]

- Are there deficiencies to clear?
 - Are the ASA and Anesthesia Type present?
 - Are all attestments signed?
 - Did you un-finalize and not sign to re-finalize?

NOTE: if a record is un-finalized for a correction, the record needs to be refinalized. **The record must be re-signed by an anesthesiologist.**

Once the case is signed, the **Finalize** button will become active. Click **Finalize** and the case will show as finalized and complete in the NOTES.
