

**Use Activity View to Complete Tasks in IView**

**Use Activity View to Complete Tasks in IView**

Activity View offers the ability to document a task when the documentation is contained in IView.

Open the task from the Task List or PAL:

1. From **Task List**, double-click on the task to be charted.

RN Tasks						
Task retrieval completed						
	<input type="checkbox"/>	Task Status	Scheduled Date and Time	Task Description	Order Details	
	<input type="checkbox"/>	Overdue	11/3/2017 6:26 CDT	Transfer-Receiving RN Documentation	11/03/17 6:26:21 CDT Placed by Discern	

2. From the PAL, click on **Chart**.

The chart opens IView in the **Activity View** band, displaying the items to be charted to satisfy the task.

- **Activity View** is only visible in IView when the task is clicked.
- Once charting is completed, the task completes.
- Charting in **Activity View** flows to the appropriate corresponding area in IView once signed.
- When IView is refreshed, the **Activity View** band will be blank.
- The **Activity View** band will no longer display once the chart is closed and re-opened.
