.ExtractionofTeeth_Desc	Extraction of Teeth Description	The following teeth were noted to be carious and requiring extraction. A moistened throat pack was inserted and _ ml of _% _ with epinephrine was injected in a standard fashion. The following teeth were removed with dental forceps and elevators: _ . The sockets were debrided and irrigated. Wounds closed with suture as needed. The oral cavity was suctioned out and the throat pack was removed. The airway was found to be clear and the patient returned to the care of anesthesia.
