Lab Dept: Serology

Test Name: POLIOVIRUS ANTIBODY

**General Information** 

Lab Order Codes: PVIS

**Synonyms:** Poliovirus Antibody, Neutralization

**CPT Codes:** 86382 x2 – Neutralization, virus

**Test Includes:** Poliovirus Type 1 & 3 Antibody, each reported as a titer.

Logistics

**Test Indications:** Assessing immunity following poliovirus vaccination, as well as

determining the poliovirus serotype responsible for recent poliovirus infection. Also serves as an aid for diagnosing immune deficiency

disorders.

**Lab Testing Sections:** Serology - Sendouts

**Referred to:** Mayo Medical Laboratories forward to Focus Diagnostics (MML Test:

FPOLO)

**Phone Numbers:** MIN Lab: 612-813-6280

STP Lab: 651-220-6550

**Test Availability:** Daily, 24 hours

**Turnaround Time:** 3 - 10 days, test set-up Monday and Thursday

**Special Instructions:** N/A

Specimen

Specimen Type: Blood

**Container:** SST (Gold, marble or red ) tube

**Draw Volume:** 3 mL (Minimum: 1.5 mL) blood

**Processed Volume:** 1 mL (Minimum: 0.5 mL) serum

**Collection:** Routine venipuncture

**Special Processing:** Lab Staff: Centrifuge specimen, remove serum aliquot into a screw-

capped round bottom plastic vial. Store and ship at refrigerated

temperatures. Forward promptly.

Patient Preparation: None

Sample Rejection: Mislabeled or unlabeled specimen

Interpretive

**Reference Range:** Polio 1 Titer: <1:8

Polio 3 Titer: <1:8

The presence of neutralizing serum antibodies (titers 1:8 up to >1:128) against polioviruses implies lifelong immunity. Some persons without detectable titers (<1:8) may also be immune as demonstrated by elicitation of a secondary-type serum antibody response upon challenge

with live polio vaccine.

Critical Values: N/A

Limitations: N/A

Methodology: Culture/Neutralization

**References:** Mayo Medical Laboratories December 2017

Focus Diagnostics December 2017

**Updates:** 3/2/2004: Test moved form Lab Corp to MML (forward to Focus

Laboratory). Test previously measured IgG antibody and now measure

total antibody.

8/20/2012: Updated MML order code and reference range information. 12/16/2013: Method update, previously listed as Complement Fixation. 6/27/2016: Polio Virus 2 is no longer reported per the reference lab.
