

PEDIATRIC DKA PREVENTION DECISION TREE

Basal/Bolus Injections

- ❑ Always give usual Basal dose as scheduled.
- ❑ Sip on carb fluids about every 15 minutes if vomiting or unable to eat carbs.
- ❑ Monitor closely until feeling better.
 - This includes checking blood sugar and ketones overnight.
- ❑ Remember to check ketones when sick, even if blood sugar is in normal range.
- ❑ Do not exercise if ketones present.
