Providing care closer to home

When your child is diagnosed with cancer or a blood disorder, you want expert medical care, the support of family and friends and a compassionate healthcare team. Through our Care Closer to Home Program, we work with your primary doctor to bring each of these things together and provide care closer to home when possible.

In addition to seeing patients at Children’s, the program allows our board-certified hematology/oncology physicians to see patients in designated outreach clinics, including:

- **St. Cloud**
  - Pediatric Short Stay & Infusion Unit
  - CentraCare Health Plaza
  - 1900 CentraCare Circle
  - St. Cloud, MN 56303

- **Hudson**
  - Hudson Hospital & Clinics Infusion Center
  - 405 Stageline Road
  - Hudson, WI 54016

To schedule an appointment with a Children’s provider, or to learn if Care Closer to Home is an option for you, talk to your Children’s nurse or physician or call 612-813-5940.
Providing care closer to home

If you have worked with Children’s to arrange for some of your cancer or blood disorder care to take place at Hudson or St. Cloud, call each location directly to schedule your infusion appointment.

• **St. Cloud**
  Pediatric Short Stay & Infusion Unit
  CentraCare Health Plaza
