Basic Functionality

1. The SkyVue toolbar is located at the bottom of the window.
2. There is a single viewport for all images.
3. Clicking an image allows you to load images/series into the active viewport.

History Tab: Best Practice

The History tab is used for the following:

- Exam comparisons
- Multiple imaging study review
- Workaround to allow viewing of studies that are either split into two separate folders or are missing the link for *This document has an image.*
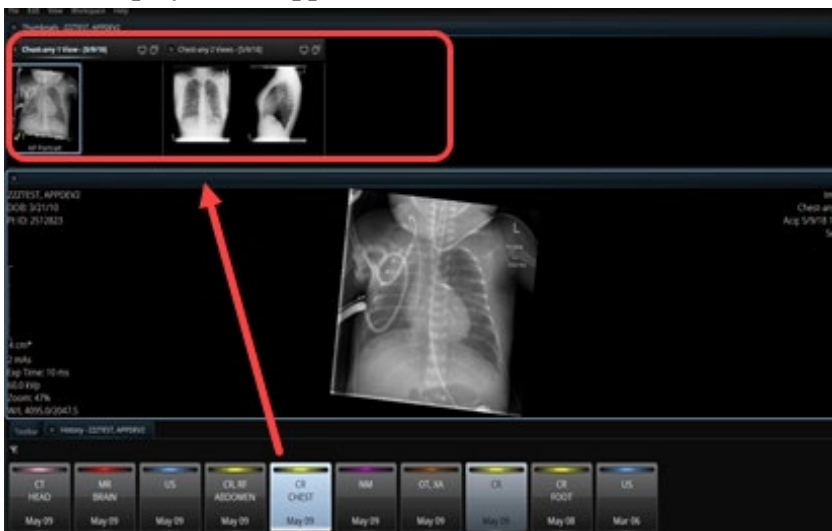

To access the History tab:

1. Click **Workspace**.
2. Click **Workspace Gadgets**.
3. Click **History**.

- The image history tabs display at the bottom of the window.

- To view additional study details for a specific image, double click the study icon. The historical exams display in the upper thumbnail list for selection and viewing.

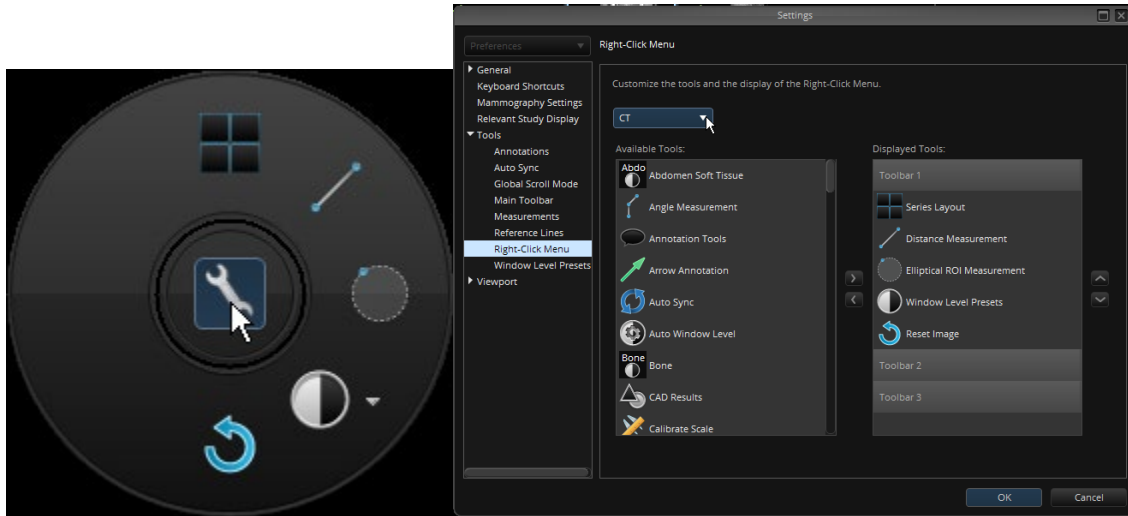

- Drag and drop the study/images from the thumbnail list into the viewer.
