## Day of Treatment PowerPlan

### Benefits:

- Day of Treatment PowerPlans create an efficient and accurate way to order multiple visits for administration of a drug (i.e., Infliximab, IVIG, etc.) with all relevant labs, supportive care medications, and monitoring as part of the powerplan.
- These plans are set up with estimated dates that can be easily adjusted when reschedules occur without further action needed from the ordering Provider.
- Assure the correct version of the drug is ordered, prepared, and administered based on what has been prior authorized.

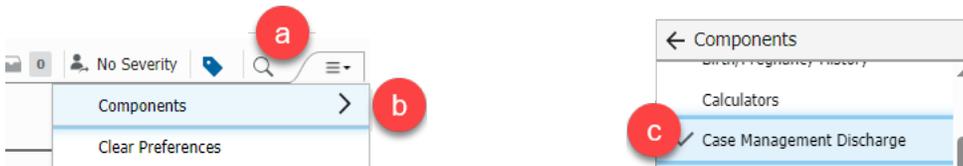

### Order a Day of Treatment PowerPlan

#### Verify Prior Authorization of Medications

1. From your IP Workflow Summary page, select the Case Management Discharge component to view the patient's prior authorization. Review approved medication(s) and status, dosing, frequency, start, and expiration dates.

Case Management Discharge			
<b>Case Management Discharge Details</b>			
Case Manager:		Phone:	
Planning Effort:			
Anticipated Discharge Date:		Planned Disposition:	
<b>Interventions</b>			
<b>Community Resources</b>			
<b>Prior Authorizations - Medications/DME</b>			
inFLIXimab (Remicade) 31745 Dose/Freq/Duration: dose and freq/duration Start Date: 05/07/24	Auth#: Med/Pharm Benefit: Med Given by Short Stay/SPS End Date: 05/07/25	Status: Approved	Exp Date: 05/07/25
Discharge Transport/External Transfer			

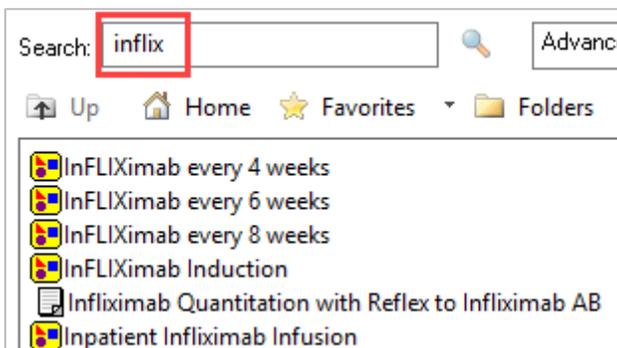

2. If the Case Management Discharge component, is not viewable:
  - a. Click the down arrow on the hamburger menu.
  - b. Select **Components**.
  - c. Select **Case Management Discharge**.

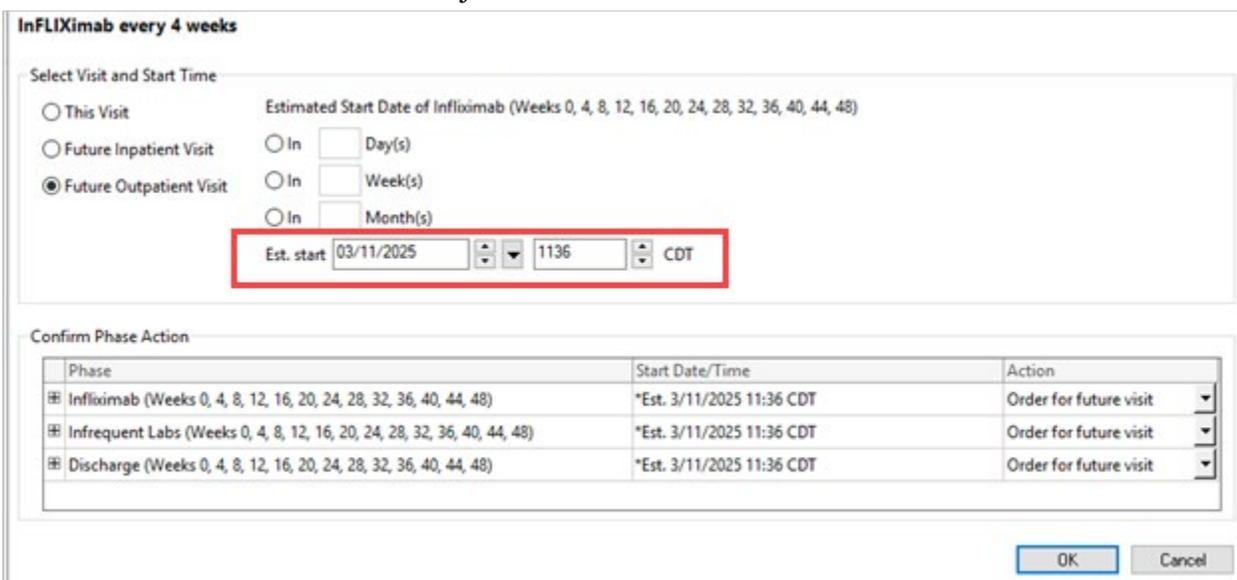

3. Review the **Problem List/Dx component**. Ensure a **This Visit** problem is selected prior to placing orders.  
 If this is a problem that will not be resolved with this visit, mark it as **Chronic**.  
 Click [here](#) for information on associating a diagnosis with an order.

**Order the Day of Treatment PowerPlan**

1. Search for the plan.

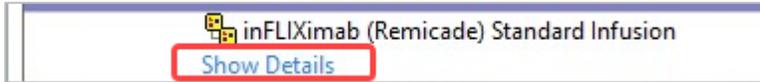

2. The current date will default as the estimated start date. Adjust if needed.  
**Note:** No other fields need to be adjusted in this window.

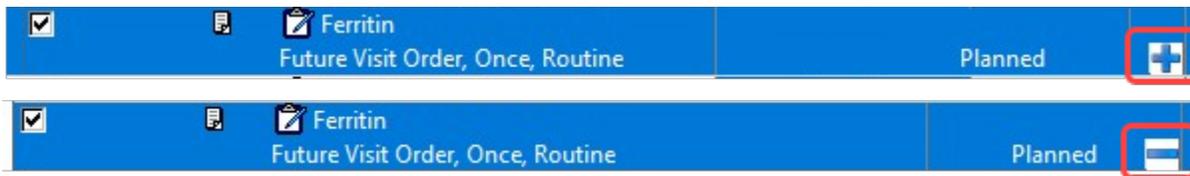

- Review the powerplan as some orders are preselected.

**Note:** To view the details of some orders, you may need to click **Show Details**.

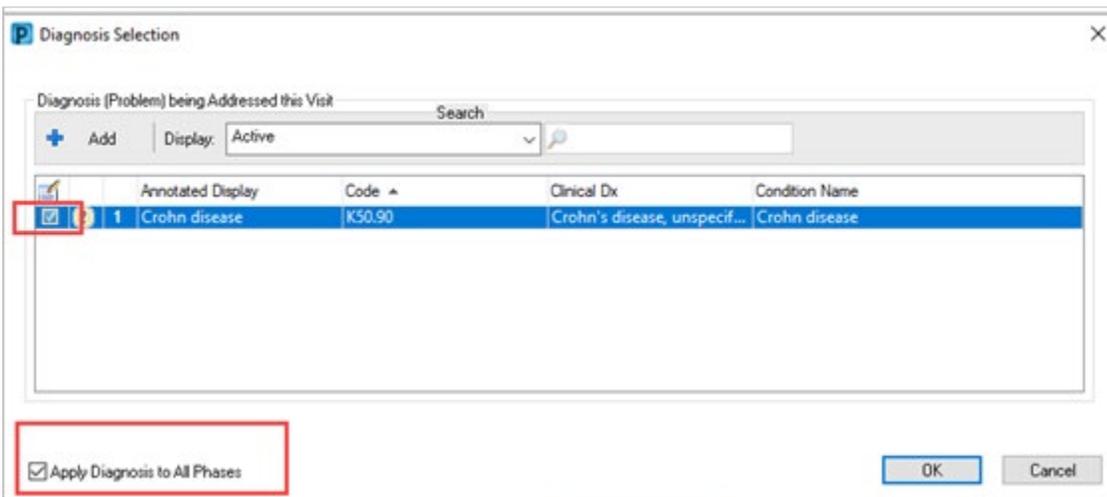

**Lab Ordering**

- Review lab orders. Labs can be added to a phase or deleted from a phase.
  - Some labs orders in the plan could be preselected for each upcoming day of treatment.
  - Some lab orders in the plan could be added to the first day of treatment when selected.
- To add or remove a lab order:
  - To add a lab order to a day of treatment, click the blue + sign.
  - To remove a lab from a day of treatment, click the blue – sign.

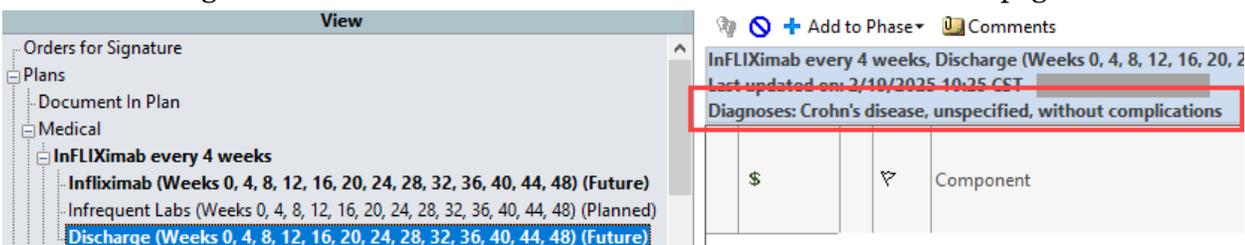

**Finalize/Sign the PowerPlan**

- When the powerplan is signed, the Diagnosis Selection window displays. Click to select the patient's diagnosis.
- Click to select **Apply Diagnosis to All Phases**.
- Click **OK**.

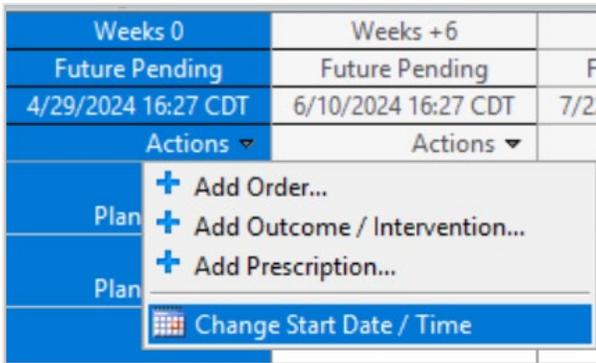

This allows the diagnosis associated with the orders to be viewable on the orders page.

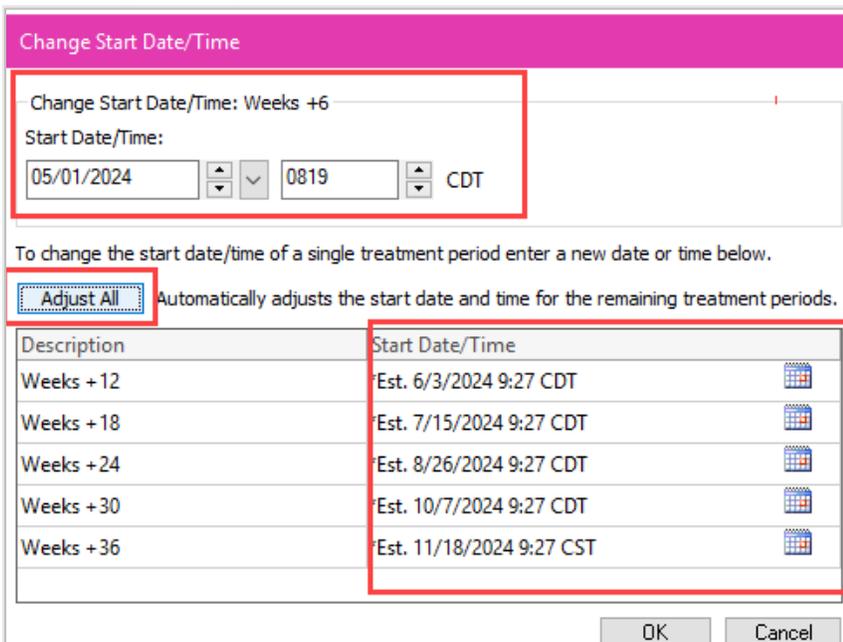

**Additional Information**

**Change Start Date and Time**

1. To change the start date/time, click the **Actions** down arrow and select **Change Start Date / Time**.

2. In the Change the Start Date/Time window, enter the correct start date/time. Select **Adjust All** to ensure remaining visit days are correct.

**Add Day to Plan**

There will be times when a day of treatment needs to be added. For example, you would like to add an additional day to the plan.

1. Select the powerplan. To add a day of treatment, click **Add to Phase** and **select Add Day of Treatment**.

- Weeks will define treatment details and the new date displays. Be sure to select **Adjust All**.

Description	Start Date/Time
Weeks 0	*Est. 5/15/2024 14:37 CDT
Weeks 2	*Est. 5/29/2024 14:37 CDT
Weeks +6	*Est. 6/26/2024 14:37 CDT

### Copy Day of Treatment

There will be times when a day of treatment needs to be rescheduled. For example, the patient arrives and is not able to receive the medication after the Day of Treatment has been activated.

- In the Orders View pane, navigate to the **Day of Treatment** needing to be reordered.
- Click the **Activate Actions** down arrow and select **Activate**. Then select **Copy Day of Treatment**.
