Ambulatory Organizer Changes

Organizer Visual Layout
The view buttons are now tabs and the date field has moved.

Organizer Resource List to Add Providers
- List of resources will now display alphabetically
- Search window (to find/add additional providers) is located at top of dropdown
Organizer Menu
There are now additional preferences that can be accessed via the menu.

Manage Columns (see the ⭐ in the screenshot above) allows columns to rearranged, added and removed.
The **Note**, **Charge** and **Task Reminders** options (previously in the menu dropdown) are now located in **Settings** (see the 🌟 in the screenshot above).

**New Patient List Properties**

To further customize and build your patient lists, additional list properties can be selected:

- Locations
- Medical Services
- Care Teams
- Relationships
- Time Criteria
- Discharge Criteria
- Admission Criteria

See additional handout (in *On the Record* – click the link on the Star Net EMR Center page)
**Workflow Summary Changes**

Menu Collapse
To maximize workspace, the Workflow Summary navigation menu will now collapse when the Powerchart window is not full screen.

Hover over the arrow to temporarily expand the menu.
Patient Education
To minimize scrolling and improve the display, you will notice a few changes when searching for and selecting Patient Education.

1. Diagnoses will now display in left hand pane – select diagnosis to see suggested material
2. Added titles appear on the bottom of the window, single-click an added title to open the editor
3. Make sure the Suggested button is selected
4. Use the Print All button to print all titles listed (separately from the depart)
5. Click Next to see additional titles
Orders Search

Sorting of search results have improved displays:

- Doses included in the search as well as doses over 1000 without thousands separator in search
- 2 letter searching
- Choosing the synonym only without a sentence (e.g. morphine) launches the Order Sentence dialog

**PRN Dispense Quantity**
The dispense quantity for PRN medications will no longer auto-calculate based on dose and frequency. The appropriate unit will autopopulate, but the quantity will need to be manually entered.
