

Use of Restore for NS Flushes after Intermittent Medications

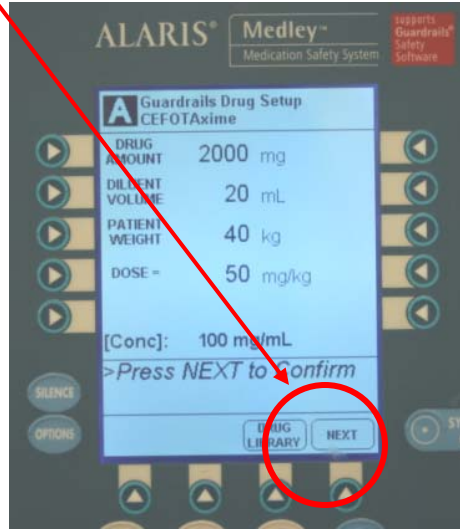

1. Medication completed: Press “Channel Select” on syringe module
2. Install Flush Syringe
3. Select Syringe type and size and “Confirm”

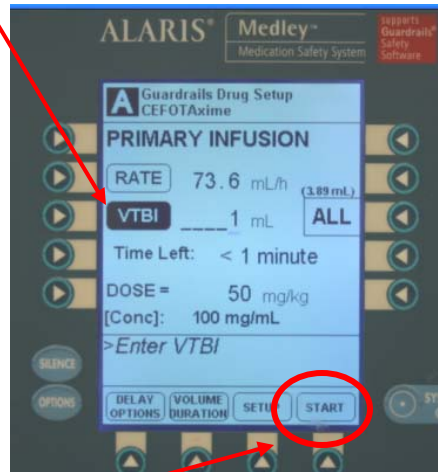

4. Select “Restore”

5. Select "Next"

6. Select "VTBI" and enter flush volume

7. Select "Start"

***Note that the Flush is now infusing at the same rate as the medication was infusing
