

Children's™

MINNESOTA

MOBILE SIMULATION BUS SPECIFICATIONS

50 amp plug configuration
120/240 volts
This configuration may not be the same as your MRI scanner plug

Other requirements:

- Level parking area (relatively, doesn't have to be perfectly flat)
- Need 75 ft long by 25 ft wide to park
- Once parked, 41 ft long by 15 ft wide
- Safe and adequate space on the passenger side for people to get on the bus (front entry door)
- If the handicapped lift has to be accessed, there needs to be at least 12 feet unobstructed width on the passenger side of the bus.
- Lab must be located no more than 85ft from the electrical source

When determining the parking area for the bus, please take into consideration the MRI/CT Scanner schedule, as the bus needs to be parked and set up the evening prior to the scheduled training date.
