Standard Precautions

Standard Precautions require all employees and volunteers to treat blood and body fluids as if they are infectious.

Volunteers should NEVER touch blood or body fluids and should not be included in any procedure where blood or body fluids are involved.

Standard Precautions
Use for all patients, all the time

Family and visitors

- Hand hygiene when entering and leaving room
- Wear if assisting with care involving blood or body fluids

Staff

- Hand hygiene when entering and leaving room
- If contact with blood and body fluids is likely
- For activities likely to generate splash or spray

Patient care equipment

- Disinfect equipment when removing from room
