**Lab Dept:** Chemistry  
**Test Name:** INFLIXIMAB/HACA MEASUREMENT

### General Information

**Lab Order Codes:** INHA  
**Synonyms:** Infliximab concentration and Anti-Infliximab Antibody; Human Anti-Chimeric Antibodies  
**CPT Codes:**  
- 80299 – Quantitation of drug, NOS (Infliximab concentration)  
- 82397 – Chemiluminescent Ab (HACA measurement)  
**Test Includes:** Serum Infliximab reported in ug/mL and HACA (Human Anti-Chimeric Ab) reported in ng/mL.

### Logistics

**Test Indications:** Serum infliximab measurement is necessary when assessing the presence or absence of HACA. Serum infliximab concentrations may vary among equally dosed patient. Measuring serum infliximab levels can aid physicians in determining the dose of infliximab and guide infusion intervals. The HACA portion of the test detects Human Anti-Chimeric Antibodies (antibodies against infliximab). Patients that develop HACA may experience infusion reactions and/or a reduced duration of efficacy of infliximab.

**Lab Testing Sections:** Serology – Sendouts  
**Referred to:** Esoterix Laboratory Services (ESL Test: 803770)  
**Phone Numbers:**  
- MIN Lab: 612-813-6280  
- STP Lab: 651-220-6550  
**Test Availability:** Daily, 24 hours  
**Turnaround Time:** 5 - 7 days  
**Special Instructions:** N/A

### Specimen

**Specimen Type:** Blood  
**Container:** SST (Marble, gold or red)
**Draw Volume:** 6 mL (Minimum: 3 mL) blood

**Processed Volume:** 2 mL (Minimum: 1 mL) serum
Note: Minimum volume does not allow for repeat testing.

**Collection:** Routine blood collection. Specimen must be centrifuged within 45 minutes of collection.

**Special Processing:** Lab Staff: Centrifuge specimen, remove serum aliquot into a screw-capped round bottom plastic vial. Store and ship frozen. Forward promptly.

**Patient Preparation:** None

**Sample Rejection:** Mislabeled or unlabeled specimen

### Interpretive

<table>
<thead>
<tr>
<th>Reference Range:</th>
<th>Inflimab: $\geq 0.4$ ug/mL indicated detection of Inflimab</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Note:</strong> In the presence of anti-inflimab antibodies, the infliximab drug level reflects the antibody-unbound fraction of the infliximab concentration in serum.</td>
</tr>
<tr>
<td></td>
<td>Human Anti-Chimeric Ab (HACA): Result $\geq 22$ ng/mL indicates detection of anti-inflimab antibodies.</td>
</tr>
</tbody>
</table>

**Critical Values:** N/A

**Limitations:** Detection limit: Inflimab concentration = <0.4 ug/mL
Detection limit: HACA = <22 ng/mL

**Methodology:** Electrochemiluminescence Immunoassay (ECLIA)
