**General Information**

**Lab Order Codes:** CHIE

**Synonyms:** ABCC8 Sequencing; CGK Sequencing; GLUD1 Sequencing; KCNJ11 Sequencing

**CPT Codes:**
- 81407 – Molecular Pathology procedure, Level 8
- 81406 x2 – Molecular Pathology procedure, Level 7
- 81403 – Molecular Pathology procedure, Level 4

**Test Includes:** ABCC8 (CH) DNA Sequencing, GCK (CH) DNA Sequencing, GLUD1 (CH) DNA Sequencing, KCNJ11 (CH) DNA Sequencing. Detects mutations including point mutations, deletions, insertions, and rearrangements.

**Logistics**

**Test Indications:** Severe, persistent hypoglycemia in newborns or infants Family history of Congenital Hyperinsulinism.

**Lab Testing Sections:** Anatomic Pathology – Sendouts

**Referred to:** Athena Diagnostics (Athena Test: 819)

**Phone Numbers:**
- MIN Lab: 612-813-6280
- STP Lab: 651-220-6550

**Test Availability:** Daily, 24 hours

**Turnaround Time:** 5 - 7 days

**Special Instructions:** Blood samples should be submitted for proband & both parents whenever possible.

Please note if the patient is symptomatic or asymptomatic. If the patient is asymptomatic, complete and submit "Informed Consent" with the specimen.

**Specimen**

**Specimen Type:** Whole blood
Container: Lavender top (EDTA) tube
Alternate tube: Yellow-top (ACD) tube

Draw Volume:
- Adult: 8 mL (Minimum: 6 mL) blood
- Pediatric (0-3 yrs): 2 mL (Minimum: 1 mL) blood

Note: Higher blood volumes ensure adequate DNA quantity, which varies with WBC, specimen condition, and need for confirmatory testing. Patients 0-3 yrs have higher WBC, yielding more DNA per mL of blood.

Processed Volume: Same as Draw Volume

Collection: Routine blood collection

Special Processing:
Lab Staff: Do Not Centrifuge. Specimen should remain in the original collection container. Store and ship at room temperature Monday – Thursday. Specimens collected Friday, Saturday or Sunday may be kept at room temp or refrigerated and shipped on Monday. Forward promptly.

Specimens are stable for 10 days at room temp or refrigerated.

Patient Preparation: None

Sample Rejection: Mislabeled or unlabeled specimens

**Interpretive**

Reference Range: Interpretive report

Critical Values: N/A

Limitations: N/A

Methodology: Sanger sequencing
