
Lab Dept: Anatomic Pathology

Test Name: NONSYNDROMIC SENSORINEURAL DEAFNESS (MTTS1) KNOWN MUTATION

General Information

Lab Order Codes: MTTK

Synonyms: Hearing Loss Genes; MTTS1-A7445G Mutation; Diabetes-deafness syndrome

CPT Codes: 81403 – Molecular Pathology, Level 4

Test Includes: Carrier testing for MTTS1.

Logistics

Test Indications: Testing of a relative for a specific known mutation (carrier testing).

Lab Testing Section: Anatomic Pathology - Sendouts

Referred to: Harvard Medical School Laboratory for Molecular Genetics

Phone Numbers: MIN Lab: 612-813-6280

STP Lab: 651-220-6550

Test Availability: Daily, 24 hours

Turnaround Time: 2 – 3 weeks

Special Instructions: Please send completed [Harvard requisition and consent](#) with the patient or specimen to the laboratory. The consent portion of the form is required. Please note that incomplete or missing paperwork may delay the start of testing.

Specimen

Specimen Type: Whole blood

Container: Lavender top (EDTA) tube

Draw Volume: 7 mL (Minimum 3-5 mL for an infant) blood

Processed Volume: Same as Draw Volume

Collection:	Routine venipuncture
Special Processing:	Lab Staff: Send lavender tubes labeled with a minimum of Name, Date of Birth, and Age. The reference laboratory accepts samples Monday through Friday from 9am to 5pm. Labeled specimens and requisitions/consents should be sent overnight at room temperature. **Notice: Samples are NOT accepted on Saturdays, Sundays or holidays. Please keep blood samples collected on these days at refrigerated temperatures until the next business day.
Patient Preparation:	None
Sample Rejection:	Mislabeled or unlabeled specimens

Interpretive

Reference Range:	Benign for familial mutation
Methodology:	PCR and Sanger sequencing assays of the appropriate exon for the known mutation. Only the single site of the mutation is reviewed and recorded for the absence or presence of the familial mutation. Confirmation of results is done by doing two unique DNA dilutions and two different set ups to rule out chance for error. High quality data must be observed in at least two unique set ups to complete the test.
