Test Name: SMOOTH MUSCLE ANTIBODY

General Information

Lab Order Codes: SMAS

Synonyms: Smooth Muscle Antibodies, serum; SMA

CPT Codes: 86255 - Fluorescent noninfectious agent antibody; screen each antibody
86256 – Titer, each antibody (if positive)

Test Includes: Smooth Muscle Antibody screen. If results are positive, the titer will be performed at an additional charge.

Logistics

Test Indications: Testing for smooth muscle antibodies is useful for the evaluation of patients with chronic liver disease in whom the diagnosis of chronic active autoimmune hepatitis is suspected.

Other diseases in this differential diagnosis group include primary biliary cirrhosis, chronic viral hepatitis, and alcoholic chronic hepatitis.

Sera from patients with autoimmune chronic active hepatitis contain antibodies to smooth muscle antigens that are detectable by indirect immunofluorescence on substrates that contain smooth muscle.

The antibodies are primarily of the IgG isotype.
